

## UNITED STATES PATENT AND TRADEMARK OFFICE

DIRECTOR OF THE UNITED STATES PATENT AND TRADEMARK OFFICE  
BOARD OF PATENT APPEALS AND INTERFERENCES  
BOX INTERFERENCE, WASHINGTON, D.C. 20231

Filed by: Fred E. McKelvey  
Telephone: (571) 272-9797  
Facsimile: (571) 273-0042

Applicants: Branstrom et al.  
Application No.: 09/512,810  
Filed: 02/25/00  
For: Bacterial delivery system

The above-identified application or patent has been forwarded to the Board of Patent Appeals and Interferences because it is adjudged to interfere with another application or patent. An interference has been declared. The interference is designated as No. 105,428.

Notice is hereby given the parties of the requirement of the law for filing in the Patent and Trademark Office a copy of any agreement "in connection with or in contemplation of the termination of the interference." 35 U.S.C. § 135(c).

---

Fred E. McKelvey  
Senior Administrative Patent Judge

1 The opinion in support of the decision being  
2 entered today is not binding precedent of the board.

41  
42 **DECLARATION**  
43 **37 CFR § 41.203(b)**

44  
45 **Part A.**  
46 **Declaration of interference**

47 1. An interference is declared between the  
48 above-identified parties. 35 U.S.C. § 135(a); 37 CFR  
49 § 41.203(b).

1           2.    Details of the application, patent, counts and  
2   claims designated as corresponding or as not corresponding to the  
3   counts appear in Parts E and F of this DECLARATION.

4                               **Part B.**  
5                               **Judge managing the interference**  
6

7           Senior Administrative Patent Judge McKelvey has been  
8   designated to manage the interference.  37 CFR § 41.104(a).

9                               **Part C.**  
10                              **Standing order**  
11

12           1.    A Trial Division STANDING ORDER (3 Jan. 2006)  
13   (Paper 2) accompanies this DECLARATION.

14           2.    The STANDING ORDER applies to this interference,  
15   including the provisions related to Electronic Filing.  See  
16   ¶ 105, pages 17-20.

17                              **Part D.**  
18                              **Initial conference call and motions lists**  
19

20                                      Conference call

21           1.    A conference call to discuss the interference is  
22   set for:

23                              4:00 p.m. (1600 hours Eastern time)  
24                              on Wednesday, 26 April 2006.

25           2.    The board will initiate the call.  
26

27                                      Motions lists

28           3.    On or before:  
29                      noon (1200 hours Eastern time) Friday, 21 April 2006,  
30   each party shall file, and on or before:

31                      5:00 p.m. (1700 hours Eastern time) Friday, 21 April 2006,

1 each party shall serve, a notice stating the relief the party  
2 requests, i.e, a motions list including motions the party seeks  
3 authorization to file. 37 CFR § 41.120(a); STANDING ORDER ¶ 204,  
4 (Paper 2, page 58).

5 4. The default procedure for filing and serving its  
6 motions lists are to be filed before being served.

7 5. By filing before service, one party will not have  
8 access to an opponent's motions list prior to filing the party's  
9 motions list.

10 6. Nevertheless, the parties may mutually agree to  
11 discuss and serve motions lists at any time prior to the date and  
12 time motions lists are due.

13 7. The following shall be included in any motions  
14 list:

15 (1) Proposed motion for benefit must identify the  
16 application(s) for which benefit will be  
17 sought.

18 (2) Proposed motion to attack benefit must  
19 identify the application(s) being attacked.

20 (3) Proposed motion seeking judgment against an  
21 opponent based on alleged unpatentability  
22 must identify the statutory basis for the  
23 alleged unpatentability and:

24 (a) if based on the prior art, identify the  
25 prior art;

26 (b) if based on the first paragraph of  
27 35 U.S.C. § 112, identify whether

1 written description, enablement and/or  
2 best mode will be the basis of the  
3 proposed motion;

4 (c) if based on no interference-in-fact,  
5 briefly identify the reason;

6 (d) if based on an alleged failure to comply  
7 with 35 U.S.C. § 135(b), briefly  
8 identify the reason;

9 (e) if claim correspondence is involved,  
10 identify any claim to be designated as  
11 corresponding or not corresponding to  
12 the count;

13 (f) if a new count is to be sought, identify  
14 the new count.

15 8. A motions list shall not contain any "reservation  
16 clause" whereby a party attempts to reserve a right to file  
17 additional motions. Additional motions are those authorized by  
18 the board consistent with the rules.  
19

20 9. A sample schedule for taking action during the  
21 motion phase appears as Form 2 (page 69) in the STANDING ORDER.

22 10. Counsel are encouraged to discuss the schedule  
23 prior to the conference call and to agree, essentially consistent  
24 with the sample schedule, on dates for taking action.

25 11. A typical motion period lasts approximately eight  
26 (8) months.

27 12. Counsel should be prepared to justify any request  
28 for a shorter or longer period.

1 Part E.  
2 Identification of the parties  
3 Assignment of exhibit numbers  
4 Initiating settlement discussions  
5

6 Junior Party<sup>1</sup>

7  
8 Named inventors: Arthur A. Branstrom, Maryland  
9 Donata R. Sizemore, Maryland  
10 Jerald C. Sadoff, Washington, D.C.  
11  
12 Application:<sup>2</sup> Application 09/512,810  
13 filed 25 February 2000  
14  
15 Title: Bacterial delivery system  
16  
17 Assignee: United States of America as represented  
18 by the Secretary of the Army

---

19 <sup>1</sup> The junior party is the party with the latest accorded priority  
20 date as set out in this DECLARATION. 37 CFR § 41.201 (definition of "Senior  
21 party"); 37 CFR § 41.207(a) (1).

22 <sup>2</sup> The file is an Image File Wrapper (IFW), not a paper file.

Senior Party<sup>3</sup>

Named inventors: Robert J. Powell, Maryland  
George K. Lewis, Maryland  
David M. Hone, Maryland

Patent:<sup>4</sup> U.S. Patent 5,877,159  
issued 2 March 1999  
based on application 08/443,790  
filed 3 May 1995

Title: Method for introducing and expressing  
genes in animal cells and live invasive  
bacterial vectors for use in the same

Assignee: University of Maryland at Baltimore

---

<sup>3</sup> The senior party is the party with the earliest accorded priority date as set out in this DECLARATION. 37 CFR § 41.201 (definition of "Senior party"); 37 CFR § 41.207(a)(1).

<sup>4</sup> The file is a paper file, not an Image File Wrapper (IFW) file. The first maintenance fee was paid on 25 July 2002. See the enclosed RAM Fee History for the patent. The second maintenance fee is not yet due.

Assignment of exhibit numbers  
37 CFR § 41.154(c)(1)

1. The senior party [Powell] is assigned exhibit  
numbers:

1001-1999

2. The junior party [Branstrom] is assigned exhibit  
numbers:

2001-2999

3. If necessary, the board will use exhibit numbers:

3001-3999

Initiating settlement discussions  
STANDING ORDER ¶ 126.1 (Paper 2, pages 40-41)

4. The senior party is responsible for initiating  
settlement discussions.

1                                   Part F.  
2                   Counts and claims of the parties

3  
4                                   Count 1

5                   A method for introducing and expressing a nucleic acid  
6                   in animal cells in vitro comprising infecting said animal  
7                   cells with live attenuated invasive bacteria selected from  
8                   the group consisting of Shigella spp, Listeria spp and  
9                   enterioinvasive Escherichia coli,

10                   [1] wherein said bacteria includes a eukaryotic  
11                   expression cassette containing said nucleic acid,

12                   [2] wherein said nucleic acid encodes an antigen, and

13                   [3] wherein said antigen is expressed at detectable  
14                   levels.

15  
16                   Count 1 is similar to and modeled after Branstrom claim 45  
17                   and Powell claim 1. The following shows what was deleted from  
18                   and added to the claims, with the matter in strikeout deleted and  
19                   the matter in brackets added.

20  
21                   A method for introducing and expressing a ~~gene~~ [nucleic  
22                   acid] in animal cells [in vitro] comprising infecting said  
23                   animal cells with live [attenuated] invasive bacteria  
24                   [selected from the group consisting of Shigella spp,  
25                   Listeria spp and enterioinvasive Escherichia coli],

26                   [1] wherein said bacteria ~~contain~~ [includes] a  
27                   eukaryotic expression cassette ~~encoding~~ [containing<sup>5</sup>] said  
28                   ~~gene~~ [nucleic acid],

29                   [2] wherein said ~~gene~~ [nucleic acid] encodes a ~~vaccine~~  
30                   [an] antigen<sup>6</sup>, [and]

---

31                   <sup>5</sup> The cassette contains the nucleic acid; it does not encode it.

32                   <sup>6</sup> The phrase "vaccine antigen" seems somewhat peculiar; the vaccine the  
33                   the composition administered and the object of administering the composition  
34                   is to produce an antigen.

1 [3] wherein said vaccine antigen is expressed at  
2 detectable levels, ~~and~~  
3 ~~[4] wherein said animals cells are cultured in vitro.~~

Count 2

A method for introducing an immune response in an animal comprising infecting said animal with attenuated live invasive bacteria selected from the group consisting of Shigella spp, Listeria spp and enterioinvasive Escherichia coli,

[1] wherein said bacteria includes a eukaryotic expression cassette containing a nucleic acid,

[2] wherein said nucleic acid encodes an antigen,

[3] wherein said antigen is expressed at levels sufficient to induce an immune response, and

[4] wherein said invasive bacteria are administered to a mucosal surface of said animal.

Count 2 is similar to and modeled after Branstrom claim 53 and Powell claim 15. The following shows what was deleted from and added to the claims, with the matter in strikeout deleted and the matter in brackets added. In addition, it is noted that neither Branstrom claim 53 nor Powell claim 15 contains an antecedent for "said gene" in the phrase "encoding said gene" in the language in each claim which corresponds to that of paragraph [1], supra.

A method for introducing an immune response in an animal comprising infecting said animal with attenuated live invasive bacteria [selected from the group consisting of Shigella spp, Listeria spp and enterioinvasive Escherichia coli],

[1] wherein said bacteria ~~contain~~ [includes] a eukaryotic expression cassette ~~encoding said gene~~ [containing a nucleic acid],

[2] wherein said ~~gene~~ [nucleic acid] encodes a ~~vaccine~~  
an antigen,

[3] wherein said ~~vaccine~~ antigen is expressed at levels sufficient to induce an immune response, [and]

[4] wherein said invasive bacteria are administered to a mucosal surface of said animal.

1 The claims of the parties are:

2 Branstrom: 34-35, 37, 39 and 45-59

3 Powell: 1-24

4 The claims of the parties which correspond to Count 1 are:

5 Branstrom: 45-52

6 Powell: 1-6, 9-14 and 16

7 The claims of the parties which do not correspond to Count 1  
8 are:<sup>7</sup>

9 Branstrom: 34-35, 37, 39 and 53-59

10 Powell: 7-8, 15 and 17-24

11 The parties are accorded the following priority benefit for  
12 Count 1:

13 Branstrom: None<sup>8</sup>

14 Powell: None

---

16 <sup>7</sup> A claim which does not correspond to any count is not involved in  
17 the interference within the meaning of 35 U.S.C. § 135(a).

18 <sup>8</sup> Branstrom claims benefit of

- 19  
20 (1) application 08/711,961, filed 06 September 1996 (an IFW file),  
21 (2) provisional application 60/018,035, filed 21 May 1996 (a paper  
22 file);  
23 (3) application 08,523,855, filed 06 September 1995, now U.S. Patent  
24 5,824,538, issued 20 October 1998 (a paper file) and  
25 (4) provisional application 60/00,3,318, filed 06 September 1995 (a  
26 paper file).  
27

28 At this time, it has not been necessary to determine whether benefit should  
29 be accorded as to Count 1 because Branstrom has been placed under an order  
30 to show cause why judgment should not be entered against it under 37 CFR  
31 § 41.202(d)(2). In the event Branstrom overcomes the order to show cause  
32 and wants to be accorded benefit of one or more of the above-identified  
33 applications, Branstrom may list a motion for benefit in its lists of motions.

1 The claims of the parties which correspond to Count 2 are:

2 Branstrom: 53-59

3 Powell: 15 and 17-23

4 The claims of the parties which do not correspond to Count 2  
5 are:<sup>9</sup>

6 Branstrom: 34-35, 37, 39 and 45-52

7 Powell: 1-14, 16 and 24

8 The parties are accorded the following priority benefit for  
9 Count 1:

10 Branstrom: None<sup>10</sup>

11 Powell: None

---

13 <sup>9</sup> A claim which does not correspond to any count is not involved in  
14 the interference within the meaning of 35 U.S.C. § 135(a).

15 <sup>10</sup> Branstrom claims benefit of

- 16  
17 (1) application 08/711,961, filed 06 September 1996 (an IFW file),  
18 (2) provisional application 60/018,035, filed 21 May 1996 (a paper  
19 file);  
20 (3) application 08,523,855, filed 06 September 1995, now U.S. Patent  
21 5,824,538, issued 20 October 1998 (a paper file) and  
22 (4) provisional application 60/00,3,318, filed 06 September 1995 (a  
23 paper file).  
24

25 At this time, it has not been necessary to determine whether benefit should  
26 be accorded at to Count 2 because Branstrom has been placed under an order  
27 to show cause why judgment should not be entered against it under 37 CFR  
28 § 41.202(d)(2). In the event Branstrom overcomes the order to show cause  
29 and wants to be accorded benefit of one or more of the above-identified  
30 applications, Branstrom may list a motion for benefit in its lists of motions.

Part H.  
Order form for requesting file copies

1. When requesting copies of files, a party shall use STANDING ORDER Form 4 (page 71).

2. Use of Form 4 will expedite processing of any request.

3. A party should attach to any request for file copies a photocopy of Part E of this DECLARATION with a hand-drawn circle around the patents and applications for which a copy of a file wrapper is requested.

4. The parties are advised that a single order for files may be filled by the Office of Public Records at more than one time, particularly in a case such as this one involving both paper and IFW files. STANDING ORDER ¶ 109.2 (Paper 2, pages 25-27).

**Part I.**  
**Required paragraph for affidavits and declarations**

1. The board has experienced cases in which a witness has belatedly advanced reasons why the witness would be unable to appear for cross examination at a reasonable time and place in the United States.

2. Consequently, to prevent surprise and hardship to the party relying on the testimony of the witness, the following paragraph must be included on the signature page of all affidavits (including declarations) filed in this case .

STANDING ORDER ¶ 157.2 (Paper 2, pages 52-53):

In signing this affidavit (declaration), I understand that the affidavit (declaration) will be filed as evidence in a contested case before the Board of Patent Appeals and Interferences of the United States Patent and Trademark Office. I also acknowledge that I may be subject to cross examination in the case and that cross examination will take place within the United States. If cross examination is required of me, I will appear for cross examination within the United States during the time allotted for cross examination.
